SUBJECT INDEX, VOLUME 13

Acenaphthylene, copolymerization with maleimides, radiation-induced, 1833
Acetaldehyde polymer, poly(vinyl alcohol)-type, 1337
Acetal polymers, branched, reversible melt flow rate, 233
Acrylic fiber formation by wet spinning, spin orientation during, 817
Acrylic fiber, pyrolysis of, 2073
Acrylonitrile–butadiene copolymers, glass transitions in, 1585
Acrylonitrile, grafting onto cellulose, 2649
Addition polymers, continuous synthesis of, 1353
Adhesion, and fracture, continuum interpretation, 29
Adhesion behavior of nylon tire cord/adhesive/rubber system, 353
Adhesion, of diallylphthalate resin and dichromate-treated copper foil, 1729
Adhesive bonding, activated gas plasma surface treatment for, 2085
Adhesives, adhesion of system with nylon tire cord and rubber, 353
Adhesive tape, pressure-sensitive, failure, 2193
Alcohols, organometallic catalysis of reaction with isocyanates, 1929
Alkoxymethyl derivatives of benzoguanamine, synthesis of, 555
Alkyd resins, molecular weight distribution of, 2601
Alkyd resin, viscosity of, effect of cooking schedule on, 2277
Allylic polymers, 463
Allylic resin, adhesion of, 1729
Amination of polymer surfaces by radio-frequency plasmas, 807
Ammonia, reaction with resorcinol and HCHO, 835
Anelastic and dielectric effects in polymeric solids, 397
ATR spectroscopy, high-temperature, 2513
Attenuated total reflectance. *See* ATR.
Autoxidation of atactic polypropylene, molecular weight changes due to, 23
Autoxidation, of polypropylene, 17, 23
Benzene hydrocarbons, effect on stress relaxation of polyethylene, 1621
Benzene–polyethylene, stress relaxation, 2506
Benzoguanamine, synthesis of alkoxymethyl derivatives of, 555
Bimetallic-adhesive laminate, with ethylene–acid copolymer adhesives, 1965
Bisphenol A diglycidyl ether, cure with *m*-phenylenediamine, 2411
Bisphenol A polymer, oxidation of, 2183
Branching, effect on rheological properties of polyolefin melts, 519
Butadiene–acrylonitrile copolymers, glass transitions in, 1585
Butadiene–styrene, anisotropy, 2541
Carbenes, modifications with, 1523, 1537
Carbon black–alkali metal complex, graft copolymerization with styrene, 2057
Cellophane, x-ray studies, 2459
Cellulose acetate membranes, porous, in reverse osmosis, 637
Cellulose, crosslinking in, 1845
Cellulose, diethylaminoethyl, anhydride reactions, 93
Cellulose fibers, disorder in, 785
Cellulose, fine structure determination, 2469
Cellulose, gamma-irradiated, graft copolymerization with ethyl acrylate, 2633
Cellulose, graft copolymerization of, 1613
Cellulose, grafting with acrylonitrile, 2649
Cellulose, hydroxypropyl-, rheological properties of, 755
Cellulose, irradiated, trapped radical spectra of, 1497
Cellulose, isothermal pyrolysis of, analysis of products of, 851
Cellulose, mechanical behavior of, 571
Cellulose, nitro, water permeability of, 249
Cellulose–propylene, Ziegler-Natta catalysts in, 1809
Celluloses, chemically modified, studies on, 323
Cellulose yarn production, fine-structure development during, 1979
Cellulosic materials. *See* Cellulose.
1-Chloro-2,3-epithiopropane, reaction with cotton or diethylaminoethyl cotton, 607
Chloro-organic compounds, effect on crosslinking of *cis*-polybutadiene, 1795
Chromatography, gas, analysis of cellulose pyrolysis products by, 851
Chromatography, gel permeation, correction of instrument spreading in, 775
cis-Polybutadiene, crosslinking of, by gamma rays, 1795
Collagen, calfskin solubilization in citrate buffer, 141
Composite materials, flex life and long term strength of, 445
Composites, polymer, strain magnification in, 867
Condensation polymerization reactors, 561
Condensation polymerization reactors, batch reactors, 487
Condensation polymerization reactors, kinetic model, 477
Cooking schedule, effect on alkyd resin molecular weight distribution, 2601
Copolyamides, crystallization of, 2643
Copolymers, block, of styrene and methacrylic acid, 629

Copolymers, of starch and polyacrylonitrile, dilution effect, 133
Cotton, diethylaminoethyl, reaction with halogenated 1,2-epoxypropanes, 81
Cotton, modified, reversible crosslinking in, 1845
Cotton, reaction with 1-chloro-2,3-epithiopropane, 607
Cotton, reactivities with cyclic urea derivatives, 1949
Cotton, swelling of, in alkalis and acids, 41
Cracking, stress, of polyethylene by fuming nitric acid, 745
Crazing, in polycarbonate, 2129
Creep, of plasticized polyester, 2621
Creep, of polyethylene, 1801
Crosslinked polypropylene, radiation, 505
Crosslinking, chemical, of high density polyethylene, 713
Crosslinking, in cellulose, 1845
Crosslinking, of *cis*-polybutadiene, 1795
Crosslinking, reversible, in cellulose, 1845
Cryogenic adhesives, poly-2-oxazolidones as, 2699
Crystallization of poly(ethylene terephthalate), liquid induced, 899
Cu(II)-bis(8-hydroxy-5-quinolyl)methane coordination polymer, thermal degradation of, 1937
Cupric sulfate–hydrazine–oxygen system, in emulsion polymerization of methyl methacrylate, 1215
Curing temperature, effect on thermal degradation of epoxide resin, 1703
Degradation, thermal of phenolic resins, 437
Degradation, thermal of polymers, 401
Density, in determination of cellulose fine structure, 2469
Density, prediction of polymer, 871
Desalination membranes, polyacrylic, 2223
Diallylphthalate resin, adhesion to dichromate-treated copper foil, 1729
Diallyl 2-substituted succinates, prepolymers of, 463
Dichroism, visible, in poly(ethylene terephthalate)-disperse dye systems, 659
Dichromate-treated copper foil, adhesion to diallylphthalate resin, 1729
Dielectric and anelastic effects in polymeric solids, 397
Dielectric properties of radiation crosslinked polypropylene, 505
Diethylaminoethyl cotton, reaction with, 607
Differential scanning calorimetry, in measurement of polymer transitions, 1373
Differential scanning calorimetry, of polyethylene blends, 2665
Differential thermal and thermogravimetric analysis of poly(*m*-aminostyrene), 401
Diffusion constants, temperature dependence in rigid, closed cell foams, 251
Diffusion of *m*-nitroaniline in polyacrylonitrile, 541
Difluorocarbene, modifications with, 1523
Diglycidyl ether of bisphenol A, cure with *m*-phenylenediamine, 2411
Disperse dye transfer, in viscose–polyester, 2677
Dispersions, mechanical, secondary, 1073
Disulfide crosslinks, cleaving in natural rubber vulcanizates, 1201
Disulfide crosslinking, of polycaprolactam, 1595
Disulfide, determination in modified cotton, 1845
Drag reduction, effect of secondary polymer structure on, 2499
Elastomer blends, stress softening in, 1309
Elastomers, RSI measurement of, 2547
Elastomers, swollen, ozone attack on, 2097
Elastomers, telechelic, 149
Electron beam irradiation, of polyethylene resin, 2689
Electron transfer polymers, thermal conductivity of, 1265
Ellis fluid, simple shearing flow of, 393
Embrittlement, of polyethylene by fuming nitric acid, 745
Emulsion polymerization, of methyl methacrylate, 1215
Emulsion polymerization, radiation-induced
of styrene, 1175
of vinyl acetate, 1175
Emulsion prepared PVC, high-temperature mechanical properties of, 55
Environmental effects on polymers, 559
EPDM polymer, effect of mastication on molecular weight and molecular weight distribution of, 797
Epoxide phenol reaction, 1473
Epoxide–polybutadiene, carboxyl-terminated, reaction extent, 2439
Epoxide polymers, nitro-substituted, thermal analysis of, 2579
Epoxide resins, chemistry of, 295
Epoxide resin, thermal degradation of, 1703
Epoxy bonds, stress corrosion cracking, 1083
Epoxypropanes, 1,-2 halogenated, reactions with diethylaminoethyl cotton, 81
Epoxy resins, B-stage, storage stable, 227
Epoxy resin, plasticized, effect of time and temperature on, 1231
Ethyl acrylate, graft copolymerization with gamma-irradiated cellulose, 2633
Ethylene–acid copolymer adhesives, 1965
Ethylene, polymerization on chromic oxide–silica–alumina catalysts, 1921
Ethylene propylene terpolymers, effects of termonomers on, 1509
Ethylene-propylene terpolymers with conjugated double bonds, 365
Ethylene, radiation polymerization of, 2657
Extrusion properties, of PVC, 69
Failure loci in thermoplastics, 459
Fatty acid derivatives, polymers from, 1545
Fiber formation, by wet spinning, acrylic, spin orientation during, 817
Fiber reinforced materials, 560
Fibers, cellulosic, disorder in, 785

Film, extruded polyethylene, structure and properties, 169
Film, polystyrene, ultraviolet radiation effect on, 599
Films, modified, gas permeation through, 669
Flexible foams, load-compression behavior of, 2297
Flex life and long term strength of composites, 445
Flow behavior, effect of hydrogen bonding on, 2721
Foams, flexible, load-compression behavior of, 2297
Foams, temperature dependence of diffusion constants in rigid closed cell, 251
Formaldehyde, reaction with resorcinol and ammonia, 835
Fractionation by ultrafiltration, 369
Fracture and adhesion, continuum interpretation, 29
Fracture, in polycarbonate, 2129
Gas chromatography, moisture determination by, 1169
Gas-liquid chromatography, use in polyurethane foam polyol analysis, 1297
Gel permeation chromatography, interrupted flow, 2029
Gel permeation chromatography. *See* GPC.
Glass-reinforced plastics, tensile strength of, 1899
Glass transition, in butadiene–acrylonitrile copolymers, 1585
Glass transition, of polystyrene, 2427
Glass transition, of poly(vinyl chloride), 2235
Glass transition temperature, of filled polymers, 2149
Glass transition, thermal behavior of polymers during, 2069
GPC, calibration, 2397
GPC chromatograms, skewed, interpretations of, 1381
GPC, detection of molecular weight and composition by, 2359
GPC, molecular weight distribution from, 1459
GPC, of hexamethyldisilazane effect on porous glass packings, 1487
Graft copolymerization, ionic, 1749
Graft copolymerization, ionic, of β-propiolactone, 2447
Graft copolymerization, of cellulose, 1613
Graft copolymerization, of ethyl acrylate with gamma-irradiated cellulose, 2633
Graft copolymerization, of methyl methacrylate on cellulose, 1569
Graft copolymerization, of β-propiolactone, 1749
Heat stability, of chemically crosslinked polyethylene, 2257
Heating, inductive, effect on interfaces, 1129
Hexamethyldisilazane, effect on porous glass packings, 1487
Hydrogen bonding, effect on flow behavior, 2721
Hydrophobic bonding, role in contraction of nylon 66, 1191
Hydroxypropylcellulose, rheological properties of, 755
Infrared spectroscopy in determination of isotacticity, 417
Infrared spectroscopy, of isotactic polybutene-1 autoxidation, 1289
Initiation systems, in graft copolymerization of cellulose, 1613
Interfaces, metals to polymers, 1129
Interfaces, selenium-organic polymer, 883
Ion bombardment, of powders, 1909
Isocyanates, organometallic catalysis of reaction with alcohols, 1929
Isotacticity, determination of by IR spectroscopy, 417
Jute, crystallinity in, 2593
Lignin, effect in graft copolymerization of methyl methacrylate on cellulose, 1569
Lubricants for rigid PVC, calcium stearate-stearic acid as, 69
Maleic anhydride, reaction with polypropylene, 1625
Maleimides, copolymerization with acenaphthylene, radiation-induced, 1833
Manganic hydroxide–hydrazine hydrate, as initiator of vinyl polymerization, 2333
Mass spectrometry, analysis of cellulose pyrolysis products by, 851
Mastication, effect on molecular weight and molecular weight distribution of EPDM polymer and SBR, 797
Mechanical behavior of cellulose, 571
Mechanical behavior of PVC, high-temperature, 55
Mechanical dispersions, secondary, 1073
Mechanical properties, dynamic, of polymers, 1707
Mechanical properties of films, relation to paint chipping, 1253
Mechanical properties, of polymers, 1899
Melt flow rate increase, reversible, of branched acetal polymers, 233
Membranes, modified polypropylene, 577
Membrane separator, substituted polybenzimidazoles as, 101
Membranes, solution cast of poly(hydroxyethyl methacrylate), 193
Mercaptan, determination in modified cotton, 1845
Mesta fibers, crystallinity in, 2593
Methacrylic acid, block copolymers of, with styrene, 629
Metal halides, stress cracking of polyamides by, 1641
Metal laurates, group II, effect on poly(vinyl chloride) thermal stabilization, 1247
Metal salts, stress cracking of polyamides by, 1641, 1657, 1673
Metal thiocyanates, stress cracking of polyamides by, 1673
Metals, interfaces to polymers, 1129
Methoxy pentadecyl phenyl isocyanate isomers, reactivity of, 1697

Methyl methacrylate, emulsion polymerization of, 1215
Methyl methacrylate, graft copolymerization on cellulose, 1569
4-Methylpentene-1, blends with petroleum jelly, 2383
Modulus–temperature relations, of chemically crosslinked polyethylene, 2257
Moisture determination, in plasticizer-pigment formulations, 1169
Moisture regain, in determination of cellulose fine structure, 2469
Molding, of polyacrylonitrile, 1159
Molecular weight, detection by GPC, 2359
Molecular weight, determination from viscosity, 2371
Molecular weight distribution, calculation from GPC, 1459
Molecular weight distribution, determination by GPC, 1381
Molecular weight distribution, effect on rheological properties of polyolefin melts, 519
Molecular weight distribution, of alkyd resins, 2601
Molecular weight, of alkyd resin, effect of cooking schedule on, 2277
Molecular weight, of atactic polypropylene, changes due to autoxidation, 23
Morphology of polypropylene, correlation of transport properties with, 685
Multiaxial impact measurement, of polypropylenes, 1421
Natural rubber vulcanizates, cleaving of disulfide crosslinks in, 1201
Nitrenes, modifications with, 1537
Nitrile content, of transparent barrier resins, 2567
Nitrocellulose, water permeability of glow discharge treated, 249
Nitrogen dioxide, reaction with polymers, 107
NMR analysis, of chlorinated poly(vinyl chloride), 1113
NMR spectrometry, study of water adsorbed on cellulose by, 1689
N-*n*-Alkylacrylamide, copolymers with vinylidene chloride, 1777
Nuclear magnetic resonance. *See* NMR.
Nucleating additives in polypropylene, 827
N, vinylcaprolactam, radical polymerization of, 1
Nylon 6, random copolymers, 2643
Nylon 11, random copolymers, 2643
Nylon 66 drawn, kinetics of contraction in aqueous phenol, 427
Nylon 66, hydrophobic bonding in contraction of, 1191
Nylon 66, in phenolic solutions, 1191
Nylon tire cord, adhesion of system with adhesive and rubber, 353
Optical rotation, of protein, effect of radiation on, 2265, 2269
Organic polymers, thermally resistant, photodegradation of, 1825
Osmosis, poly(hydroxyethyl methacrylate) membranes in, 193
Osmosis, reverse, poly(hydroxyethyl methacrylate) in, 193
Osmosis, reverse, porous cellulose acetate membranes in, 637
Oxygen, effect on radiation-induced polymerization, 2705
Ozone attack, on swollen elastomers, 2097
Paint chipping, relation to mechanical properties of films, 1253
Permeability, water, of glow discharge treated nitrocellulose, 249
Permeation, gas through modified polymer films, 669
Petroleum jelly, blends with 4-methylpentene-1, 2383
Phenoxy resin, photo-oxidation of, 9
p-Phenylene monomers, disubstituted, 215
Photocrosslinking, of stilbene-modified polymers, 2247
Photodegradation, of organic polymers, 1825
Photo-oxidation of phenoxy resin, 9
Photo-oxidation, of polypropylene, 1447
Photopolymerization, oxygen consumption in induction period of, 241
Phthalic anhydride, tetrabromo-, in self-extinguishing polyesters, 535
Plasmas, radiofrequency, attachment of amino groups to polymer surfaces by, 807
Plasticizer-pigment formulations, moisture determination in, 1169
Plastics, vinyl, volatile combustion products of, 377
Polyacrylic desalination membranes, 2223
Polyacrylonitrile, copolymers with starch, dilution effect, 133
Polyacrylonitrile, diffusion of *m*-nitroaniline in, 541
Polyacrylonitrile–starch graft copolymer, base-hydrolyzed, 2007
Polyacrylonitrile, structural modification of, 1159
Polyamides, stress cracking of, by metal halides, 1641
Polybenzimidazoles, substituted, aliphatic as membrane separators, 101
1,4-Polybutadiene, addition of carbon tetrachloride to, 1721
Polybutadiene, crosslinking of, by gamma rays, 1795
Polybutadiene–epoxide, carboxyl-terminated, reaction extent, 2439
Polybutene-1, isotactic, autoxidation of, 1289
Polycaprolactam, disulfide-crosslinked, 1595
Polycaprolactam, disulfide-crosslinked, stress relaxation of, 2169
Polycarbonate, ductile brittle transition in, 2129
Polydimethylsiloxane, supercooling of, 2113
Polyester plasticizers, exudation of, from poly(vinyl chloride), 2341
Polyesters, self-extinguishing, 535
Polyester resins, unsaturated, crosslinking in, 2119
Polyester resins, unsaturated, dielectric relaxation in, 2119

Polyester–viscose, disperse dye transfer in, 2677
Polyester, plasticized, creep behavior of, 2621
Polyethylene–benzene, stress relaxation, 2506
Polyethylene, blends, differential scanning calorimetry of, 2665
Polyethylene, chemically crosslinked, 2257
Polyethylene, creep, stress dependence, 1801
Polyethylene, embrittlement and stress cracking of, by fuming nitric acid, 745
Polyethylene film, structure and properties of extruded, 169
Polyethylene filters, porous, by radiation polymerization, 2657
Polyethylene, flowing melts, shear modulus of, 2313
Polyethylene, high density, chemically crosslinked, 713
Polyethylene oxide, preformed, effect on starch, 1493
Polyethylene resin, electron beam irradiation of, 2689
Polyethylene, rheological behavior of, 395
Polyethylenes, intrinsic viscosity of, 341
Polyethylene, stress relaxation of, 1621
Polyethylene-styrene graft copolymers, gas permeation through films of, 669
Poly(ethylene terephthalate), visible dichroism in disperse dye system with, 659
Poly(ethylene terephthalate), liquid induced crystallization of, 899
Polyethylene, viscosities of solutions in ethane, propane, and ethylene, 117
Poly(hydroxyethyl methacrylate), membranes of, in osmosis and reverse osmosis, 193
Poly(*m*-aminostyrene), homo-, co-, and related polymers, DTA and TGA of, 401
Poly(*m*-aminostyrene), thermal degradation of, 2033
Poly(*m*-aminostyrene), vacuum pyrolysis of, 1555
Polymerization, condensation, batch reactors, 487
Polymerization, condensation, continuous reactors, 561
Polymerization, condensation, reactors, 477, 487, 561
Polymerization, condensation, reactors, kinetic model, 477
Polymers, reactions with SO_2 and NO_2, 107
Polymers, testing of, 398
Polyolefin melts, effects of branching and molecular weight distribution of rheological properties of, 519
Poly-2-oxazolidones, as cryogenic adhesives, 2699
Polypropylene, autoxidation of, 17, 23
Polypropylene, effect of sulfur compounds on, 1329
Polypropylene, isotacticity of, 417
Polypropylene melts, molecular weight distribution influence on properties of, 309
Polypropylene membranes, modified, liquid transport in, 577
Polypropylene, nucleating additives in, 827
Polypropylene, photo-oxidation of, 1447
Polypropylene, radiation crosslinked, physical and dielectric properties of, 505
Polypropylene, reaction with maleic anhydride, 1625
Polypropylenes, multiaxial impact measurements of, 1421
Polypropylene, stabilized, effect of titanium compounds on, 1859
Polypropylene, thermally conditioned, correlation of transport properties with morphology of, 685
Polypyromellitimide, 1073
Polystyrene film, ultraviolet radiation produced changes in, 599
Polystyrene, shear properties in transition region, 1993
Polystyrene, viscosity near glass transition, 2427
Polytetrafluoroethylene, decomposition of burning, 285
Poly($\alpha,\alpha,\alpha',\alpha'$-tetrafluoro-*p*-xylylene, 2325
Poly(2,2,4,4-tetramethyl-1,3-cyclobutylene carbonate), haze in, 2483
Polyurethane elastomers, segmented, thermomechanical analysis of, 1277
Polyurethane foam polyols, rigid, gas-liquid chromatography of, 1297
Poly(vinyl chloride), annealing of, 2235
Poly(vinyl chloride), chlorinated, NMR analysis of, 1113
Poly(vinyl chloride), exudation of polyester plasticizers from, 2341
Poly(vinyl chloride), properties, effect of processing on, 1767
Poly(vinyl chloride), thermal stabilization of, 1247
Powders, ion bombardment of, 1909
Precipitation threshold, molecular weight dependence of, 253
Processing, effect on poly(vinyl chloride) properties, 1767
β-Propiolactone, graft copolymerization of, 1749
β-Propiolactone, ionic graft copolymerization, 2447
Propylene-cellulose system, Ziegler-Natta catalysts in, 1809
Propylene-ethylene terpolymers with conjugated double bonds, 365
Protein, effect of radiation on, 2265, 2269, 2293
Protein viscosity, effect of irradiation on, 1895
PVC, high-temperature mechanical behavior of emulsion polymerized, 55
of suspension, 55
PVC, rigid, lubricants for, 69
PVC. *See* Poly(vinyl chloride).
Pyrolysis, of acrylic fiber, 2073
Pyrolysis of cellulose, analysis of products, 851
Pyrolysis. *See also* Thermal degradation.

Pyrolysis, vacuum, of poly(*m*-aminostyrene), 1555
Quartz phenolic, effect of impulsive preloadings on, 2045
Radiation crosslinked polypropylene, 505
Radiation-induced polymerization, effect of oxygen on, 2705
Redox behavior, in photochromic thiazine polymers, 1883
Resorcinol, reaction with HCHO and NH_3, 835
Reverse osmosis, poly(hydroxyethyl methacrylate) membranes in, 193
Reverse osmosis, porous cellulose acetate membranes in, 637
Rheology, influence of molecular weight and polydispersity on, 765
Rheological properties of water-soluble hydroxypropylcellulose, 755
Rheological properties of polyolefin melts, effects of molecular weight distribution and branching on, 519
Rheometer, capillary, measurements of extrusion properties of PVC, 69
Rotating spherical interlayer. *See* RSI.
RSI measurement, of elastomers, 2547
Rubber, adhesion of system with adhesive and nylon tire cord, 353
Rubber reinforced polymers, examination of, 337
Rubber, synthetic, molecular chain stiffness, 2527
SBR, effect of mastication on molecular weight and molecular weight distribution of, 797
Selenium-organic polymer interfaces, 883
Self-extinguishing polyesters, 535
Shearing flow of Ellis fluid, 393
Shear modulus, of flowing polyethylene melts, 2313
Shear properties, of polystyrenes, 1993
Shear rates, low, effect on rheological behavior of linear polyethylene, 395
Sodium, diffusion and partition in nonionic polymer membranes, 2209
Spinning, dry, 257
Spinning, wet spin orientation during acrylic fiber formation by, 817
Starch, copolymers with acrylonitrile, dilution effect, 133
Starch, effect of preformed polyethylene oxide on, 1493
Starch–polyacrylonitrile graft copolymer, base-hydrolyzed, 2007
Stilbene-modified polymers, photocrosslinking of, 2247
Stress corrosion cracking, effect of water on, 1083
Stress corrosion cracking, of epoxy bonds, 1083
Stress cracking, of polyamides, by metal salts, 1641, 1657, 1673
Stress cracking, of polyethylene by fuming nitric acid, 745
Stress dependence, of polyethylene creep, 1801
Stress relaxation, of disulfide-crosslinked polycaprolactam in water, 2169
Stress relaxation, of polyethylene, 1621
Stress relaxation, of polyethylene–benzene, 2506
Stress softening, in elastomer blends, 1309
Structure-property relationships for liquid transport in modified polypropylene membranes, 577
Styrene, block copolymers of, with methacrylic acid, 629
Styrene–butadiene, anisotropy, 2541
Styrene, graft copolymerization with carbon black–alkali metal complex, 2057
Styrene-polyethylene graft copolymers, gas permeation through films of, 669
Styrene, radiation-induced emulsion polymerization of, 1175
Styrene, viscosity of polymerizing solutions of rubber in, 2735
Succinates, diallyl 2-substituted prepolymers of, 463
Sulfonium polymers, preparation and properties of, 721
Sulfur compounds, effect on melt stability of polypropylene, 1329
Sulfur dioxide, reaction with polymers, 107, 2504
Supercooling, of polydimethylsiloxane, 2113
Surface free energy, 1741
Suspension prepared PVC, high-temperature mechanical properties of, 55
Swelling of cotton in alkalis and acids, 41
Tackiness, measurement of, 493
Telechelic elastomers, 149
Temperature, effect on plasticized epoxy resin, 1231
Tensile strength, of glass-reinforced plastics, 1899
Tensile testing device, 571
Terpolymers, elastomer-modified, structure–property relationship in, 1873
Testing of polymers, 398
Tetrachlorination, of 1,4-polybutadiene, 1721
Tetrabromophthalic anhydride in self-extinguishing polyesters, 535
Thazine photochromic polymers, redox behavior in, 1883
Thermal analysis, of nitro-substituted epoxide polymers, 2579
Thermal conductivity, of electron transfer polymers, 1265
Thermal degradation, 1555
Thermal degradation, of Cu(II)-bis(8-hydroxy-5-quinolyl)methane coordination polymer, 1937
Thermal degradation, of epoxide resin, 1703
Thermal degradation, of poly(*m*-aminostyrene), 2033
Thermal stabilization, of poly(vinyl chloride), 1247
Thermogravimetric analysis and DTA of atactic poly(*m*-aminostyrene) homo-, CO–, and related polymers, 401
Thermomechanical analysis, of segmented polyurethane elastomers, 1277
Thermoplastics, failure loci in, 459

Time, effect on plasticized epoxy resin, 1231
Titanium compounds, effect on stabilized polypropylene, 1859
Transition temperature, of N-*n*-alkylacrylamide and vinylidene chloride copolymers, 1777
Transitions, differential scanning calorimetry in measurement of, 1373
Transparent barrier resins, nitrile content of, 2567
Transport, liquid in modified polypropylene membranes, 577
Transport properties, correlation with morphology of polypropylene, 685
Trithiane, polymerization of, 1435
Tung's axial dispersion equation, 1319
Ultrafiltration, method for fractionating polymers, 369
Ultraviolet radiation, effect on polystyrene film, 599
Urea, cyclic derivatives, reactivities with cotton, 1949
Urethanes, organometallic catalysis of, 1929
Vinyl acetate, radiation-induced emulsion polymerization of, 1175
Vinylbenzyl, aryl, synthesis of sulfonium polymers from, 721
Vinyl chloride, polymerization, 2019
Vinylidene chloride, copolymers with N-*n*-alkylacrylamide, 1777
Vinyl plastics, volatile combustion products of, 377
Vinyl polymerization, manganic hydroxide–hydrazine hydrate as initiator, 2333
Viscose–polyester, disperse dye transfer in, 2677
Viscosities of moderately concentrated solutions of polyethylene, 117
Viscosity, intrinsic, of polyethylenes, 341
Viscosity, intrinsic, single-point determination of, 2031
Viscosity, molecular weight determination from, 2371
Viscosity, of alkyd resin, effect of cooking schedule on, 2277
Viscosity, of polystyrene, 2427
Viscosity, of protein, effect of irradiation on, 1895
Viscosity, of rubber in styrene, 2735
Vulcanizates, structural characterization of, 1201
Water adsorption, on cellulose, NMR study, 1689
X-Ray diffraction, in determination of cellulose fine structure, 2469
X-Ray diffraction, of cellophane, 2459
Yielding, in polycarbonate, 2129
Young's modulus, 1073
Ziegler-Natta catalysts, in cellulose–propylene system, 1809
